A Growing and Prosperous Little City on the North ern Pacific Railroad.

Gentralia is one of those thriving, gushing towrs on the Pacific division of the Northern Pacific railroad—that great irunscontinental thoroughfare—which has developed with great thorough are—which has developed with gira-rapidity during the past two jears, and is des-fined to, continue in even an increase I ratio, as its various advantages as a business point and a place of residence become better and more vividity known. At the time the railroad wis count leted the present town site was owned by one (recige Washington, a colored man, who immediately laid his land out in lots, and named the town Centerville Soon after this the post-effice, which had previously been at Skookunchuck, a small trading point six imles distant. was changed to Centerville but this causal as much annoyance in the constant misdirection of mail matter that it was decided to change the name of it o town to Centralia, which was done by an act of it eigenlature about a year ag, and which is now the proper postoffice ad tre It will be uchred that to

At a distance of four to time niles from the town there are immense coal fields in some places the veins being eleven feet in thickness. These mines have not peticen developed, but a company is now being formed with ample capital and work in this direction will no doubt soon be commenced in an extensive cale, as they are so located as to be easily accessible and can be worked at little car. An educational institution to be known as trace seminary, is under consideration, eleven acres of ground having been deeded for its site and considerable stock subscribed for the construction of the building, work on which will be commenced next summer. ### ELECTION FOR CHIEF PRGINERR

ast evening between a and 9 o clock the three fire companies (? East Portland cast their balots for chief engineer, the candidates being Jas. H. Sprague, the present incumbent and as the other companies strongly supported their nonliness, the vote of each being nearly squal—12., 44 in the Second ward and 41 in the Third Dieger's friends, however confidently claim he will have a sofficient majority in the combined vibs of these two wards to offset a possible majority for Sprague in the upper ward but in any event the result will be close. The ordinarce governing the election provides that each company shall meet at their "regular place of meeting" to dast their ballots, which "shall be scaled up 1; the acting secretary of each company and delivered to the city recorder, and shall be by his opened and counted in the presence of the common council at their first regular meeting in December." There is opportunity for technic ical quitbles to be made on two points, viz. Rabel Company cast their ballots at Lang's store, corner of Fourth street and Holladay avenue, instead of their "regular place of meeting," as provided by ordinance and the name of Heory Meyer was misprinted "Meyers" on the ball ots cast for him. Na serious dispute is anticipated, however. A suspense of one week is necessary under the existing law before the result can be known.

Paketa is a purt of the Lemisian procluse. In the fresh of 1803 by which France ceded to the Urited Sit test we sat domain west of the Mississipt, I is the following sentence. "The inhabitants of the cedest territory and be incorporated in the union of the United States and admitted as soon as possible, according to the principles of the febral constitution, o the enjoyment of all the rights, advantages and immunities of citizens of the limit I states." Under this clause Arkansas and other teritories which has a since become states claused their right to admission.

These cluttons are not given to prove the ovisiones of a legal, technical right, but merely to show evidence of the general right is a long recognized principle of our political system. Congress has no more right to keep Jaketa out of the union permanently than it has to put Massachusetts out.
